FOR IMMEDIATE RELEASE

Electri-Flex Company Updates Full Product Catalog

Electri-Flex has updated and re-released a full product catalog featuring their complete line of nearly 40 types of flexible metallic and non-metallic conduit. This 40 page catalog incorporates the following product categories: Jacketed Metallic / Liquatite[®], EMI/RFI Shielding / Shield-Flex[™], Unjacketed Metallic, and Non-metallic conduits. The catalog changes consist of updated information on existing products, as well as the following new products:

- LTFG - a NSF Certified Component for Food Grade applications, flexible conduit;
- Colored Conduits, available in a variety of jacketing types and colors ranging from red, green, blue, orange, yellow, white, and many more;
- the Shield-Flex[™] line of shielding conduit;
- ABRH, a non-jacketed, CSA-Certified flexible aluminum conduit;
- FSC, a non-UL, non-jacketed flexible steel conduit;
- and Flexible Metal Pre-assembled Whips.

To request a copy of the full product catalog, please visit www.electriflex.com and click on Literature, or email mktg@electriflex.com.

Electri-Flex Company, a leader in electrical conduit design and manufacture for more than 55 years, produces Liquatite[®], the most diverse line of liquid tight flexible electrical conduit in the industry. The company offers custom design, engineering, quality assurance and testing capabilities.
