**Subject: Material Safety Data Sheets (MSDS)  
OSHA Standard 29 CFR 1910.1200**

The above reference OSHA Standard requires that certain manufacturers of chemicals and compounds provide documentation (MSDS) detailing Toxic and Hazardous Substances.

According to 1910.1200(b)(6) This section does not apply to: 1910.1200(b)(6)(V) **Articles** (as that term is defined in paragraph (c) of this section):

*Definitions. Article* means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, *e.g.*, minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

All products manufactured or supplied by Electri-Flex Company fit this definition and are classified as "Articles". As a result, these products do not require Material Safety Data Sheets (MSDS).

We trust this information will be satisfactory. Should you require additional information, please contact us.
